Are you getting tired of cleaning up the foul language in the articles that your Joomla authors have been submitting, JBehave is a simple plugin that will make this task a thing of the past. Just add all the foul words that you don't want to appear in your site and JBehave will replace them with the designated mask in the content.

You can use it with the [yvComment](#) extension to filter those bad words from your comments list.

So relax, you have a clean site with 

.
