{slide=How do I use JBehave}

After you have installed JBehave, you have to configure and enable the plugin under Plugin Manager.

{/slide}{slide=How do I configure JBehave}

JBehave is actually straightforward

1. Just enter your desired Mask (default is ***)
2. Enter or Add words to censor/filter separated by commas.
3. Enter or Add words to exclude
4. That's it.
